Maria Gonzales · Jan 22

Project code PR-CP-02 not found in Acumatica

ERP_REF_MISSING

🕒 2 min ago · 3×

⬆

What happened

Lumber tried to push the timesheet for **Maria Gonzales** (8.5 hrs, Jan 22) to Acumatica under project code `PR-CP-02` , but Acumatica returned a 404 — the project code no longer exists there.

How to resolve

- Verify project `PR-CP-02` exists in Acumatica (may have been archived)
- If the project was renamed, re-map this timesheet to the new project
- Or skip this record and have the PM resubmit under the correct project

Raw response

```
HTTP 404 Not Found { "error": "ProjectNotFound", "message": "No project with code 'PR-CP-02'", "entityType": "PM.Project" }
```

🔄 Retry
